# Triumph of the Nerds *(Video)* -– The Birth of the Personal Computer

Part 3: Great Artists Steal. Adding a GUI and the Birth of Mac!

- Graphical User Interface
- Xerox Park
- Steve Jobs
- Macintosh
- Adobe
- Windows

What are the names of these 2 computers?

3. PCs were not user friendly until this type of interface was added. This interface would allow you to interact with pictures rather than typing in words.

6. A research center that was created to develop new ideas for the paperless office of the future. They became the inventors of some of the most innovative computer products we use today.

1. The name of the first personal computer that Xerox created. Many of the features that are seen on Macintosh or Windows today were developed by Xerox on this machine.

5. Steve Jobs says that he doesn't care if he is right. Then what does he care about?

7. What company could have been the IBM or Microsoft of the 90s, if they had only understood what they had?

8. Last name of the man who was hired by Steve Jobs from Pepsi and then was recommended to the Apple Board that Steve be removed?

2 (Down). What was driving IBM's personal computer sales?

4. According to Steve Jobs, there have been only two milestone products in the personal computer industry. What was to be the third?

2 (Across). According to Steve Jobs, how has Apple, like great artists, acquired most of its great ideas?
