

Model Storyboard – Resort Website.

25 pts.

Create a Storyboard for your “Resort Website.” A Storyboard is a drawing of each page that will be a part of your “Resort Website.” **The drawings must be done using Google Draw.** I just pushed a Google Draw canvas to you - you will be able to find it in this class’s folder in your Google Drive. Your Design Document needs to show the following.

1. The graphics, buttons and navigation bars that will be presented on the page.
2. A brief summary of the information that will be on the page. Your website should be detailed.
3. Show how your website is organized by the layout and lines.

Note 1: The image below is of a website I created using Google Draw.

Note 2: Your website is not locked into the design you present on your storyboard. Your website should continue to change as you get new ideas as you build it.
