

Model Design Document (Storyboard) – Resort Website.

25 pts.

Create a design document (a.k.a. Storyboard) for your “Resort Website.” A design document is a drawing of each page that will be a part of your “Resort Website.” **The drawings must be done using Google Draw.** I just pushed a Google Draw canvas to you via Heparo – you will be able to find it in this class’s folder in your Google Drive. Your Design Document needs to show the following.

1. The graphics, buttons and navigation bars that will be presented on the page.
2. A brief explanation of the information that will be on the page.
3. Show how your website is organized by the layout and lines.

Note: The image below is of a website I created using Google Draw.
