# Understanding Variables & Operators *(10pts.)*

1. Write the number or numbers that are covered by the first line of code *(above).*

2. Write the number or numbers that are covered by the second line of code *(above.)*

3. Write at least <u>two</u> ways that you can create an operator so that the "Variable" = "25" is either 'equal to' or 'included in' the answer.

4. Write the number or numbers that are covered by the third line of code *(above.)*
   Hint! The answer is not obvious. Do not think like a mathematician when writing the answer…Think Like A Computer!

---

5. Create Two Operators.
   Follow the video tutorial on the class website titled "Creating an Operator" – the video will show you how to create Operators in Scratch.
