

Final Cut Pro: Exporting Video Step-By-Step Guide

After you have rendered, saved and viewed the film you have created on the Sequence/Timeline, then follow the steps below to Export (compress) your film into a useable file format.

1. Double click the Sequence you want to export. This ensures that you will be exporting the correct film.

2. Then select: Main Menu / File / Export / Quicktime.

3. A window will appear asking you where you want to save it. Save it to your Final Cut project folder on your desktop.

You Are Done!
